

Contract Management® PLUS

Oracle/Primavera's Contract Management software is the best of breed application for managing contracts and documentation related to those contracts. **CMPlus** provides the added functionality users have always wanted.

**CMPlus** is a 100% browser based compilation of utilities and functions to be used with Oracle / Primavera Contract Management. **CMPlus** uses the Contract Management API to communicate with Contract Management. This will ensure compatibility to any upgrades from Oracle/Primavera.

## Have you ever said this?

*"I wish I could assign a drawing to a set without having to add a revision to each drawing one by one"*

*"I want to import drawings and revisions with custom fields and the attachments ALL AT ONCE"*

*"If I could only approve multiple Daily Reports at one time"*

*"Isn't there a simple import/export function to my accounting system?"*

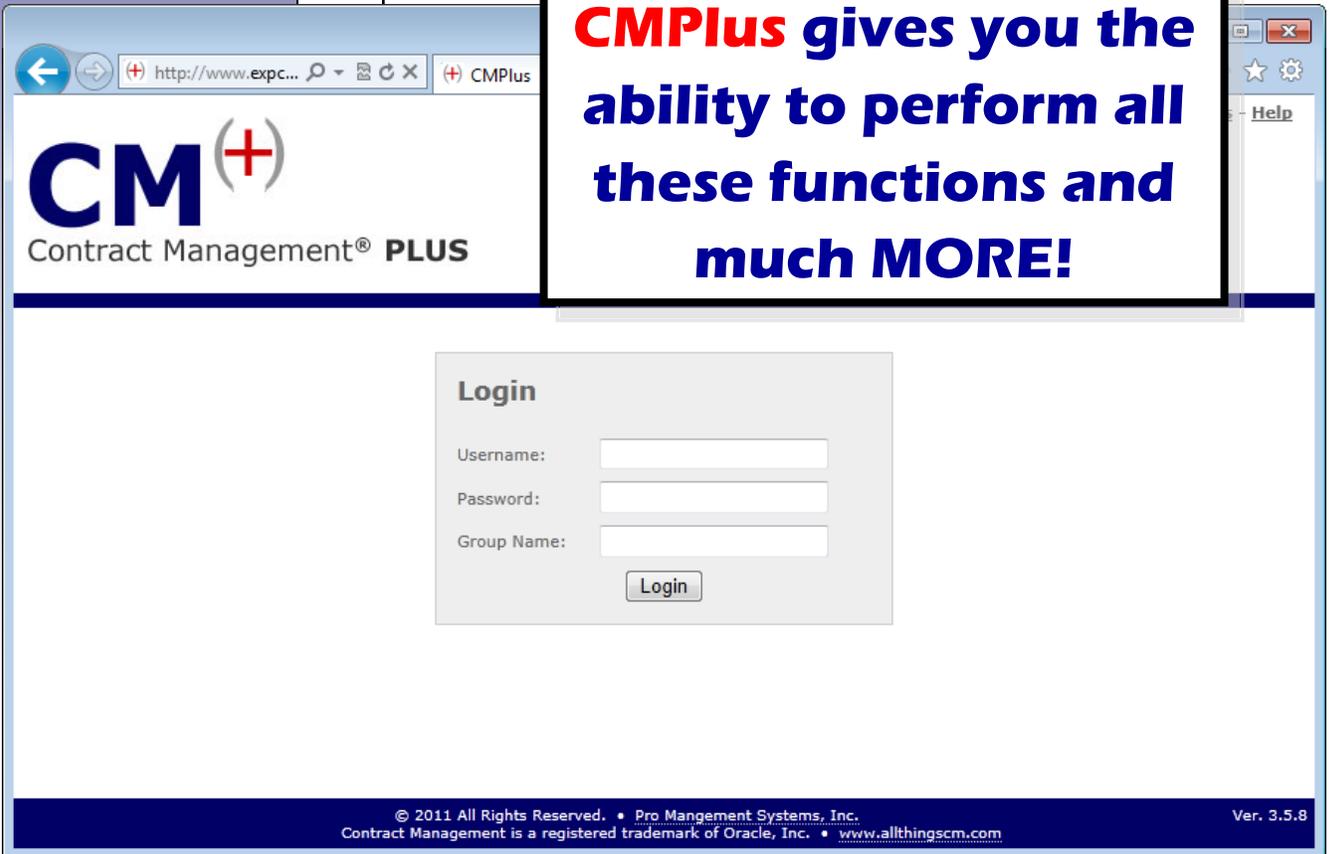

*"I need a way to import issues?"*

*"It would be so much easier to delete multiple records at the same time"*

*"I want to import all those dictionaries—adding items one at a time is VERY time consuming"*

*"I can't believe submittals and drawings are not linked"*

**CMPlus gives you the ability to perform all these functions and much MORE!**
